

Are you ready for a **chew-resistant** drinking valve?

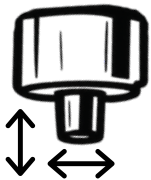

Stainless Steel for Enhanced Durability

AquaValve® features a chew-resistant stainless steel ligit that reduces the risk of valve failure and cage flooding.

Reusable Between Cage Changeouts

Save money by reusing AquaValve® with the same animals. Simply discard the valve at your regular cage changeout interval.

Easily-Activated Ligit

The AquaValve® ligit activates in all directions (horizontal and vertical) making it easier for weanlings to operate.
