

Provide complete nutrition with DietGel® 93M

Improve Intake and Reduce Variability

With balanced macronutrients and essential vitamins and minerals based on AIN 93M, DietGel® 93M supports general health and research consistency.

Simplify Feeding and Standardize Care

Highly-palatable and commercially sterile, DietGel® 93M is a proven alternative to manual mash diets that reduces labor and contamination risk.

Easy and Ready-to-Use

Simply peel off the lid and place the 2 oz cup in the cage. The ready-to-use format saves time and reduces labor for your animal care teams.
