Proprietary Gel Beads for Feed Attractant Top-Dressing and Hydration Supplementation Applications

AquaBeads are a ready-to-use, high-moisture gel bead designed for application as a top-dressing to starter feed at the time of placement to accelerate early discovery of feed and water for improved health and growth performance.

Clearly Better Quality

- 01 **Nutritional Hydration**
Water gel beads enhanced with electrolytes and betaine to provide both hydration and nutrition supplementation.
- 02 **Highly Attractant**
Translucent green color stimulates hatchling attraction to accelerate feed discovery.
- 03 **Contaminant Free**
Commercially sterile and independent laboratory tested.
- 04 **Quality Assurance**
Produced in an FDA approved and SQF certified facility with Certificates of Analysis available at www.clearh2o.com.

Clearly Better Convenience

- 01 **Ready-To-Use**
No measuring, mixing, or addition of water needed for easy, clean, and convenient administration.
- 02 **Packaging**
34 lb pail (60 pails/pallet)
- 03 **Shelf Life**
18 months at room temperature. No refrigeration required if unopened.

Instructions

- Apply as a feed top-dressing at a rate of 1-2 grams/hatchling/day at the time of placement.
- Applications may range from 1-3 days depending on hatchling and environmental conditions.
