Ensure reliable hydration with AquaPak®

AquaPak® is a ready-to-use, pure water solution packaged in a 450mL+ pouch, designed to support research animals during extended periods. Ideal for reducing labor and ensuring consistent hydration, AquaPak® is the practical alternative to traditional water bottles, making animal care more efficient and effective.

Why choose AquaPak:

- 01 Simplifies hydration management**
by eliminating the need for bottle refilling and cleaning.
- 02 Packaged under stringent quality standards**
and available in acidified or chlorinated options for enhanced safety.
- 03 Provides up to two weeks of hydration**
for 5 mice, ensuring optimal water intake.
- 04 Unrivaed Compatibility**
AquaPak® is designed to work with most cage designs.

Clearly Better Convenience

- 01 Purified Ingredients**
Formulated with carefully selected ingredients to ensure safety, efficacy, and consistency for optimal animal care.
- 02 Commercially Sterile**
Manufactured under stringent quality standards to achieve commercial sterility, ensuring product integrity and safety.
- 03 Committed to quality**
Products are clearly labeled with lot and expiration dates, and COAs are available to ensure transparency and traceability.

Instructions

- To be administered under the direction of a veterinarian
- Manufactured for use in research animals
- Dosage: Based on an average daily water consumption of 5mls/ mouse/day, one 420ml and 450ml AquaPak® pouch will last at least 14 days for a five-mouse cage density.
